La temperatura ambiental, velocidad del viento, y dirección se miden en un Davis Weather Monitor II®, los sensores están en el techo de la estación de campo. La lluvia se mide con un Pluviómetro Hellmann. La temperatura superficial del mar se mide manual

Ambient temperature, wind speed, and wind direction are measured with a Davis Weather Monitor II®; the sensors are on the roof of the field station. Rain is measured with a Hellmann Rain Gauge (Pluviometer). Sea surface temperature is measured manually
