La temperatura ambiental, velocidad del viento, y dirección se miden en un Davis Weather Monitor II®, los sensores estan en el techo de la estación de campo. La lluvia se mide con un Pluviometro Hellmann. La temperatura superficial del mar se mide manualmente con un termómetro de mercurio.

Ambient temperature, wind speed, and wind direction are measured with a Davis Weather Monitor II®; the sensors are on the roof of the field station. Rain is measured with a Hellmann Rain Gauge (Pluviometer). Sea surface temperature is measured manually with a mercury thermometer
